CONCEPT

The List is a project which reflects the work of a team of professionals who firmly believe in creating properties which stand out. The result is the fruit of months of long working days, drawn out conversations and imaginative ideas.

This effort is reflected in a true luxury living experience in what will undoubtedly feel like the ideal place to spend the best moments of your life.

The homes offer the most beautiful views of the nearby Mediterranean and the Costa del Sol from their unique location between the sea and the mountains. Located in the cosmopolitan and unmistakable city of Marbella, the idea for The List arose, with the sole objective of creating a dream paradise to call home. It's not just a house; it's more a lifestyle project for your future. The importance of the architectural forms was crucial during these long discussions between those CONCEPT responsible for the creation of this dream project called The List. The styles of the buildings were designed to visually and sensorially regenerate you based on instinctive imagination. The concept was to reinvigorate the construction model for villas, taking their best qualities and including them in our homes.

The façades, aesthetics, the double height living rooms, the open spaces and new perspectives offer a sense of spaciousness, where we can make total use of the available space in a much richer and elegant way.

“Our concept is for you to take part in your house design. You can participate in the creation of your home together with us, being able to apply the finishing touches to suit your tastes.”

FOUNDATIONS AND STRUCTURE

Foundation by reinforced concrete slabs and a mixed structure of reinforced concrete and steel.

ENCLOUSERS AND FACADES

Façade enclosure formed by an exterior sheet of brickwork and thermal insulation.

Plastered and painted facades.

GRESPANIA brand porcelain stoneware exterior wall tiles, Lyon Taupe natural model in 40x80cm format.

The interior distribution of the houses will be executed with dry walls with insulation.

The dividing walls between the different houses will be made with sound-absorbing brick and double cladding of dry partition walls with insulation.

LININGS

INTERIOR LININGS

For the flooring in the main areas of the house and kitchens, we will use ROCERSA porcelain stoneware in 75x75cm format with a skirting board of the same material on the ground floor and basement.

Bedrooms flooring in TIMBERWISE Finnish natural wood laminate, OAK Vintage model with white skirting.

Vintage grade contains filled cracks and healthy black knots of various sizes. The number of knots, filled knots, and filled cracks varies. Black fillings are part of a genuine vintage look. Small depressions are also allowed in the filled knots and cracks. The grade is characterized by the natural colour variation of oak from light to dark.

“The overall look of the Vintage grade is stunning, rugged and rustic.”
